

Estimated carbon footprint

Base year 2024

Our estimated carbon footprint for base year 2024 is 56.1 tCO₂e

The footprint per member of staff is approximately 7 tCO₂e

Scope1 – direct emissions from owned or controlled sources

tCO2e
24.2
 43%

Scope2 – indirect emissions from purchased electricity

tCO2e
13.1
 23%

Scope3 – indirect emissions that occur in the supply chain

tCO2e
18.7
 33%

The breakdown of the associated footprint is as follows:

Category	Associated_footprint_(tCO2e)
Business Vehicles	24.2
Fuels and Electricity	13.1
Employee	
Commuting	7.46
Materials	7.34
Business Travel	2.34
Water	1.09
Freight	0.417
Waste	0.043
Refrigerant Gas	0
Purchases	0
Overall_footprint	56.1
Number of staff	8
Footprint per staff member	7.0125

Our target

We have a target to reduce our carbon footprint scope 1, 2 and 3 emissions by **40%** by 2030 from the 2024.

Targets

Scope 1	Our target is to reduce the impact of the direct emissions of our organisation, including combustion of fuels and fugitive emissions, by 40% per employee by 2030.
Scope 2	Our target is to reduce the impact of our in direct emissions of our organisation, including purchased electricity and heat, by 40% per employee by 2030.
Scope 3	We will develop our ability to accurately measure and produce targets to reduce our other indirect emissions, i.e. those associated with our organisation, including supply chain, transport and distribution, business travel and commuting, use of products, waste, investments and other leased assets or franchises by 2025 and put in place a formal reduction plan with a target reduction of 40% by 2030.

Our Plan

Our targets for carbon reduction are attached

Conclusion

Realistic Prosthetics Ltd is dedicated to making a significant and measurable contribution to the reduction of our Carbon Footprint.

We will implement our reduction plan and review our targets on a regular basis.
